EDUCATION & CREDENTIALS

Education	Ho Chi Minh City University of Technology (HCMUT) <i>Bachelor of Engineering in Industrial Systems Engineering GPA: 3.3/4.0 (2025–2026)</i>	Expected 2027
Credentials	Lean Six Sigma Yellow Belt - LSSI Learn; Six Sigma Council-accredited Microsoft Office Specialist: Associate - Microsoft / Certiport TOEIC Listening & Reading - ETS	935/990

TECHNICAL SKILLS

Data & BI: SQL, Power BI, Excel, PostgreSQL, Data Warehousing, OLAP, Streamlit, Minitab
Industrial Engineering: Arena, Oracle Crystal Ball, Time Study, Line Balancing, Yamazumi, VSM, VA/NVA, Capacity Analysis
Quality & NPI: Lean Six Sigma, DMAIC, SPC, PFMEA, DFMEA Support, Control Plan, FAI, ECN, BOM Validation
Automation & Enterprise: PowerShell 5.1, HTML/CSS, Google Apps Script, Vibe Coding (Claude Code, Codex), Git/GitHub, Microsoft Dynamics 365 Finance & Operations, SharePoint/OneDrive, MS Project, AutoCAD 2D

EXPERIENCE

Wahl Clipper Vietnam <i>New Product Introduction (NPI) Intern</i>	Mar 2026 – Sep 2026 Cần Giuộc, Long An
– Developed the Master Carton Fit Tool, reducing fit-analysis setup from approximately 15 minutes to 1 minute per finished good (93%), saving an estimated 35–42 technician-hours / VND 2.8–3.4M annually across 150–180 transfers, and helping prevent recurrence of 71 operator-hours / VND 4.26M in 2025 carton-fit trial downtime. – Built the Inspection Standard Tool around a 52,929-row weekly BOM, image/PDF handling, and Excel-template generation; reduced preparation time from approximately 40 minutes to 10 minutes (75%). – Reduced full-drive engineering-file lookup with the Engineering File Search Tool / Digital 5S from repeated 15-minute searches to under 1 minute, with an estimated 3–4 hours / VND 12.5–16.6M saved annually per technician. – Supported FAI, PFMEA, Control Plans, ECN reviews, pilot/quality builds, supplier-localization drawings, and BOM/route validation in Microsoft Dynamics 365 Finance & Operations.	

PROJECTS

Manufacturing Failure Analytics Pipeline <i>CO4031 Coursework</i>	2026
– Built an AI4I 2020 analytics pipeline with Python/pandas, PostgreSQL star schema, SQL/OLAP, Streamlit/Plotly, and XGBoost with SMOTE and SHAP explainability.	
Master Carton Fit Tool <i>Internal Packaging Decision Tool</i>	2026
– Automated six-orientation fit checks, batch audits, ranked alternatives, 3D comparison, and set-cover analysis; cut audit time from about 15 minutes to 1 minute per FG , saving an estimated 35–42 hours and VND 2.8–3.4M annually , while designed to prevent recurrence of 71 operator-hours of 2025 carton-fit trial downtime worth VND 4.26M at VND 60,000/hour .	
Engineering File Search Tool / Digital 5S <i>Internal Engineering Tool</i>	2026
– Reduced full-drive engineering-file search from repeated 15-minute manual lookups to under 1 minute , saving an estimated 3–4 hours/week and VND 12.5–16.6M/year per technician .	

EXTRACURRICULAR

Bach Khoa Ambassador Club Project Leader, BKFC Nguyễn Hữu Cánh High School - used content analytics to guide a six-month campaign that generated 6,347 views , with 89.3% reach from non-followers.	Nov 2025 – Present
Mechanical Engineering Faculty Youth Union, HCMUT Event MC, Coordinator & STEM Member - developed runbooks and coordinated logistics and milestones for a 90-participant camp and Green Summer activities.	Jun 2025 – Nov 2025
Play & Learn English Club HR Member - standardized tracking and task ownership for a 15-member team, improving coordination and reducing missed deadlines.	Sep 2024 – Present
