EDUCATION & CREDENTIALS

Education	Ho Chi Minh City University of Technology (HCMUT) <i>Bachelor of Engineering in Industrial Systems Engineering</i>	Expected 2027 GPA: 3.3/4.0 (2025–2026)
Credentials	Lean Six Sigma Yellow Belt - LSSI Learn; Six Sigma Council-accredited Microsoft Office Specialist: Associate - Microsoft TOEIC Listening & Reading - ETS	935/990

TECHNICAL SKILLS

New Product Introduction: 7-Step EPM Process, DMAIC framework, **PFMEA and Control Plans** development during NPI, Root cause analysis to resolve late-found issues.

Lean & Process Improvement: 7 IE Tools (Intermediate) (VSM/Flowchart, Motion & Time Study, Line Balancing using Yamazumi, Man-Machine Analysis, Motion Economy, Poka-Yoke), **3M** (Muri-Mura-Muda).

Quality: 7 QC tools (Pareto, Histogram, Control Charts, Fishbone, Scatter Diagram, Check Sheet, Flowchart), **PFMEA**, **Minitab** (Regression and Stats).

Data & BI: SQL(Fundamental), Power BI, Advanced Excel (VBA, Pivot table), PostgreSQL, OLAP, Streamlit

Automation & Enterprise: AutoCAD 2D (Intermediate), Microsoft Dynamics 365 F&O, **PowerShell scripting**, Google Apps Script, **AI-Assisted Software Development** (Claude Code, Codex, Antigravity), Git/GitHub

EXPERIENCE

Wahl Clipper Vietnam <i>New Product Introduction (NPI) Intern</i>	Mar 2026 – Sep 2026 (6 months) Cần Giuộc, Long An
– Developed the Master Carton Fit Tool, reducing fit-analysis setup from approximately 15 minutes to 1 minute per finished good (93%), saving an estimated 42 technician-hours / VND 3.4M annually across 180 transfers, and helping prevent recurrence of 71 operator-hours / VND 4.26M in 2025 carton-fit trial downtime. – Built the Inspection Standard Tool around a 52,929-row weekly BOM, image/PDF handling, and Excel-template generation; reduced preparation time from approximately 40 minutes to 10 minutes (75%) and prevent missing part in inspection documentation. – Reduced full-drive engineering-file lookup with the Engineering File Search Tool / Digital 5S from repeated 15-minute searches to under 1 minute, with an estimated 4 hours / VND 16.6M saved annually per technician. – Supported FAI, PFMEA, Control Plans, ECN reviews, trial assemblies, supplier-localization drawings, and BOM/route validation in Microsoft Dynamics 365 Finance & Operations.	

PROJECTS

Manufacturing Failure Analytics <i>Data Warehouse Coursework</i>	2026
– Built a predictive-maintenance pipeline with Python, PostgreSQL, Streamlit, XGBoost, SMOTE, and SHAP for failure classification and explainability.	
Manufacturing Downtime Dashboard <i>Power BI Project</i>	2026
– Created a Power BI dashboard to compare actual versus standard performance, rank downtime through Pareto analysis , and target process improvements.	
Assembly-Line Simulation <i>Modeling & Simulation Coursework</i>	2026
– Modeled an eight-stage assembly line in Arena to analyze throughput, utilization, bottlenecks, queues, and WIP , then tested line-balancing improvements.	

EXTRACURRICULAR

Bach Khoa Ambassador Club Project Leader , BKFC Nguyễn Hữu Cảnh High School - used content analytics to guide a six-month campaign that generated 6,347 views , with 89.3% reach from non-followers.	Nov 2025 – Present
Mechanical Engineering Faculty Youth Union, HCMUT Event MC, Coordinator & STEM Member - developed runbooks and coordinated logistics and milestones for a 90-participant camp and Green Summer activities.	Jun 2025 – Nov 2025
